Mounting-Documentation-Systems (MDS) + APP

- High controllable torque output
- Guaranteed traceability and documented joints
- Repeatability in tightening – regardless of disturbances
- High mobility – independent of external power supply
- Torque- and angle sensor directly on the square drive
- Several preset programs
- Menu-guided, easy operation

HSD (manual)

CLSD (pneumatic)

alkitronic® APP application diagram

alkitronic® APP

- For use in combination with alkitronic® HSD and CLSD
- Multilingual
- Simple operation
- Suited for iOS and Android smartphones
- Bluetooth interface
- International quality standards

Product Range

THERE ARE MANY TECHNIQUES FOR TIGHTENING BOLTS.
WE OFFER THE RIGHT TOOL FOR YOUR APPLICATION.

- ✓ **ELECTRIC** (Electric Torque Multipliers)
- ✓ **PNEUMATIC** (Pneumatic Torque Multipliers)
- ✓ **HYDRAULIC** (Hydraulic Torque Wrenches)
- ✓ **MANUAL** (Manual Torque Multipliers)

THE ELECTRICS

Electric torque multipliers by alkitronic® are ideal for high torques, fast operating speeds, high precision, and tightening of many joints due to its fast speed. From 75 to 31,345 ft.lbs, the IP54 rating protects the tool against moisture and dust. Up to 4,425 ft.lbs, the alkitronic® EB (battery-driven) is portable and always ready for use.

THE PNEUMATICS

Forget impact wrenches with a torque setting! Unlike impact wrenches our tools need no hammer mechanism. They rotate continuously. This produces greater bolted joint accuracy and longer tool life. Also for use in hazardous areas! Up to 35,400 ft.lbs.

There is no substitute for the perfect torque multiplier or hydraulic bolting solution. Whether for assembly, production, or construction sites, one should apply the best possible way to obtain the ideal torque.

Using alkitronic's universal bolting solutions program, you do not have to compromise performance, accuracy, efficiency, productivity, nor safety. The unique quality of our solutions made in Germany gives you a leading edge in performance.

■ ■ ■ MADE IN GERMANY

alkitronic X^H-SERIES

THE HYDRAULICS

Hydraulic wrenches are ideal when heavy bolt connections with large threads need to be tightened with great force in areas difficult to access.

Torques up to 61,200 ft.lbs. Also they are safe for applications in areas exposed to explosion hazards. Our fast hydraulic pumps speed up your work flow and thus save you time and money.

alkitronic X^M-SERIES

THE MANUALS

Manual torque multipliers by alkitronic® replace hazardous and inaccurate impact wrenches, pipe extensions and other inadequate tools.

An anti-wind-up ratchet prevents a backwind when tightening. This is designed for safer tool operation.

Torques from 150 to 36,880 ft.lbs.

M-HG

From 150 to 36,880 ft.lbs. Equipped with anti-windup ratchets.

alkitronic® Norwolf Missing-/XCE Link

Missing Link up to 3,600 ft.lbs. Uses ratchet or non-ratchet wrenches. Accurate - operates using levers, not gears. XCE Link up to 7,200 ft.lbs.

Flange Buddy

Ideal for separating of piping for inspection works/maintenance. Easy and absolutely safe mechanical separation of piping flanges.

Accessories Standard

Flexible solutions for your applications.

alkitronic® and Norwolf manual torque multipliers replace impact wrenches, pipe extensions, and other inadequate and hazardous methods of torque tightening. They are superior to ordinary torque wrenches.

Feel the difference!

- High level of operation safety
- Low energy input, accurate transfer of high torque. No energy source needed - "Manpower" is enough!

M-HG

- Robust power gear for highest possible operational demands; produced in a chipless precision process (casting)
- Precision anti-wind-up ratchet for efficient operation with very short movements and short assembly time
- Integrated shearing pin prevents input overload

XCE Link

- Continuous rotation for use with any electric or pneumatic driven torque multiplier
- Robust, low-wear, long service life

H-AT

Up to 53,100 ft.lbs.

H-AX

Up to 36,300 ft.lbs with interchangeable hexagon link.

Norwolf X Driver System

Up to 61,200 ft.lbs with interchangeable hexagon link.

Pump NOVA

Electric driven hydr. pump up to 10,000 psi, max. 915 cu.in./min.

Pump VELOX

Electric driven hydraulic pump. Up to 10,000 psi.

Pump LEVA

Electric driven hydraulic pump up to 10,000 psi. Small, low weight, reliable - ideal for service use.

Hydraulic wrenches are sometimes the first choice for certain industrial bolting applications; i.e. in restricted and difficult to access bolt connections. Our wrenches and pumps offer:

- For bolting applications that require powerful performance in tight spaces, the flat design is made to fit in small spaces without sacrificing power. This gives you better accessibility, better power, and reduced repair costs
- Due to trouble-free reaction, torque accuracy is achieved without interference by lateral forces
- Fast and simple changing of the hexagon link ensures flexible tool operation
- The hydraulic pumps are extremely robust and handle high work rates
- Integrated motor protection prevents overload damages
- Electric pumps NOVA, VELOX and LEVA can be used worldwide in all power supplies

CLS

From 45 to 2,580 ft.lbs.
Fast and compact.

CLS2

From 90 to 35,400 ft.lbs and
power gear.

CLD

From 120 to 7,230 ft.lbs.
Comfortable and rotating.

CLV

For 1-4 torque multipliers, up to
2,580 ft.lbs. With remote control.

RCL

For bolting connections
on plate heat exchangers.

CLD-N

With extension
for low-lying joints.

Pneumatic torque multipliers by alkitronic® offer far more than impact wrenches or ratchet hydraulic wrenches. During the bolting process, they rotate continuously without any hammer or ratchet mechanism. Tightening the components is thus made smoother, faster and more accurate.

- Torque accuracy is considerably higher than that of impact wrenches
- Compact design and the cast aluminium housing ensure high strength
- High-performance gear ensures fast operation speed
- Simple one-finger rocker switch ensures a more comfortable operation
- All pneumatically driven torque multipliers can be EX certified upon request (II 2 G D c IIB T6)
- Optional: noise reduction filters, 2 speed tools, assembly, etc.

EB-S (with battery)

From 90 to 4,425 ft.lbs.
Bolting programs, Bluetooth,
Documentation of bolted joints.

EAF (with battery)

Battery driven 2-speed torque
multiplier, up to 4,425 ft.lbs.,
fully-automatic release function.

EAF-N (with battery)

With extensions for
applications i.e. on deep rims.

EF-S / EF-A

From 315 to 30,980 ft.lbs.
Bolting programs, Bluetooth.
EF-A = angled version.

EC-S / EC-A

From 55 to 4,815 ft.lbs.
Bolting programs, Bluetooth.
EC-A = angled version.

R / SG

For bolting connections on
plate heat exchangers.

In 1984, company founder Albert Kipfelsberger invented and patented the electric torque multiplier. Immediately it demonstrated major advantages over hydraulic torque wrenches.

- Greater accuracy due to automatic motor shut-off and extremely high rundown speed
- Repeat shut-off accuracy $\pm 2\%$
- Torque tools with brushless synchronized motor creating a greatly reduced risk of failure and maximum flexibility
- Models with protection class IP54 immune to dust and rain
- Tools usable in all international main grids (100-253 V / 45-66 Hz) with constant torque precision
- Master quality bolting according to the torque/angle procedure
- For user-specific applications, the manufacturer can activate optional modular software
- Bluetooth interface for communication or documentation of the bolted joints (via alkitronic® APP)

havasis

alkitronic® XE-SERIES

EB-S

Battery driven
torque multiplier

The new EB - Extreme Flexibility

Applications

- **alkitronic® EB:** Battery-driven torque multiplier from 170 Nm to 6,000 Nm / 125 ft.lbs to 4,425 ft.lbs.
- **Extremely mobile and always ready for use:** Innovative product design for comfortable working - independent of external power supply.
- **Permanent higher joint quality** by continuous rotation of the square drive.

Advantages

- **Ergonomic design:** Ultra grippy housing for your safety and a secure bolting procedure.
- **OLED-display:** Anti-glare and high contrast – for perfect reading under all weather conditions.
- **High quality bolting:** The brushless synchronous motor with excellent efficiency and the smart processor-controlled automatic shutdown ensures amazing increased productivity and **low running costs**.
- **Low noise emissions, no noise protection necessary.**
- **alkitronic® smart service:** Enabling wireless documentation and information.
- **Unique 1-finger trigger:** Unbeatable efficiency through fast, simple change of direction of rotation.
- **Maximum flexibility:** Thanks to the application-specific, modular software packages from **alkitronic®** - e.g. bolting according to the torque/rotation angle method with adjustable min./max. torque limitation. Can also be retrofitted later if the bolting application changes.
- **Repeat shut-off accuracy ± 3%** for the same bolting application.

alkitronic® specials

- **Simple navigation:** Intuitive interface drastically reduces operating errors and misadjustments.
- **Health and safety first:** Due to a new technology patented by **alkitronic®** the reaction torques are decoupled. This leads to an extreme reduction of radial forces on the wrist to 1Nm and thus actively contributes to the occupational health and safety of the worker.
- **Outstanding battery concept:** Vast increase in operating time thanks to innovative switching from 4 to 6 Ah.

Bolting programs

The software suite 1 is pre-installed in the basic equipment. For user-specific applications, the manufacturer can activate optional modular software:

Software suite 1: Torque controlled bolting (standard)

Software suite 2: Torque/angle procedure for high-quality bolting connections

Software suite 2

Premium: Torque/angle procedure with adjustable min./max. torque limitation

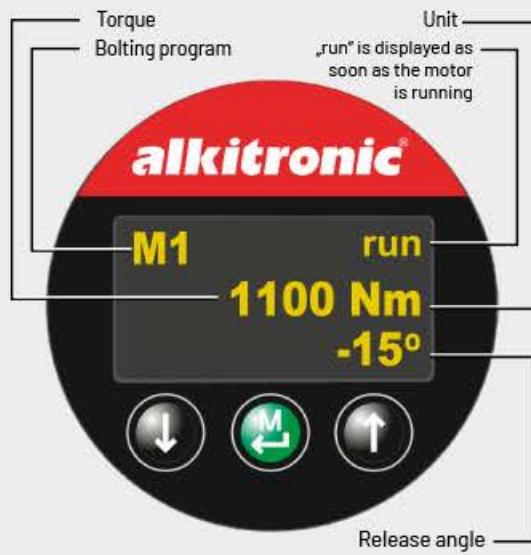

Software suite 3: Bolting with preset rotations and torque limit

Software suite 4: Bolting parameters according to individual customer requirements

Software suite 5: Bluetooth transmission via **alkitronic® APP**.

Documentation of the bolted joints (target-actual status, recording for each joint)

Operating panel

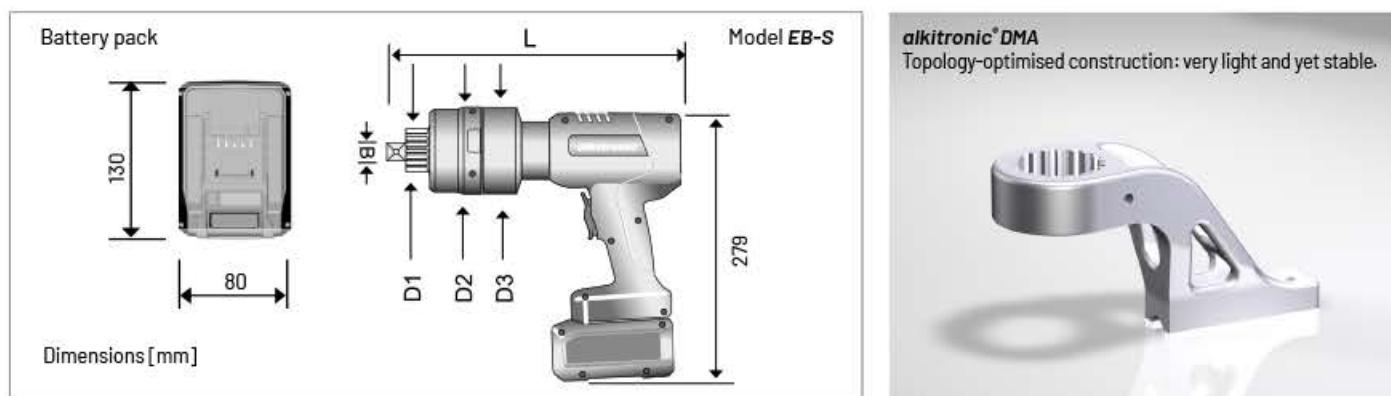

Specifications

All **alkitronic® EB** torque multipliers with CE-certification.

Caution! The Li-Ion battery is preset to 4 Ah (72 Wh) so that it can be shipped or transported in accordance with special regulation 188.

alkitronic® X E-SERIES

EC

Electric Torque Multiplier

Kurumsal & Ürünler

havasis.com.tr

Sipariş & Danışma Hattı

0549 449 3535

Applications

- **alkitronic® EC-S / EC-A** electric torque multipliers from 75 to 6,530 Nm (55 to 4,815 ft.lbs).
- **Consistent torque accuracy** on all international power supplies 100 – 253 V / 45 – 66 Hz.
- **Precise shut-off** with on-site voltage-controlled portable generators.
- Models **alkitronic® EC-A** angled tools, low height for difficult access applications.

Advantages

- **Safe interruption-free work** in any weather (moisture, rain) - thanks to protection class IP54.
- **Low running costs:**
Low-wear, maintenance-free, brushless synchronous motor.
- **Permanent higher joint quality** by continuous rotation of the square drive.
- **Simple 1-finger trigger operation** for forward and reverse.
- **OLED-Display** anti-glare and high contrast – for perfect reading under all weather conditions.
- **Menu-guided intuitive operation**, with control and warning signals.
- **Ergonomic and comfortable operation:**
The 360 degree rotating handle prevents reaction forces being transferred to the operator.

alkitronic® specials

- **High-quality bolting**, according to torque/angle procedure.
- Highly innovative generation of electric torque multipliers with new sensorless control motor technology. Lower power consumption increases the service life of the electronic components.
- **Repeat shut-off accuracy** $\pm 2\%$ for the same bolting application.
- **Precise reproduction of preselected torque** through intelligent, processor-controlled motor with automatic shut-off.
- **Longer service life:** Low heat generation – thus highest reliability and almost no downtime.
- **Robust and long lasting:** Motor housing of cast aluminum.

Specifications

Bolting programs:

For user-specific applications, the manufacturer can activate optional modular software (**alkitronic® EC-S / EC-A** from serial number 712700).

Software suite 1:	Torque controlled bolting (pre-installed)
Software suite 2:	Torque/angle procedure for high-quality bolting connections
Software suite 2:	Torque/angle procedure with adjustable max. torque limit
Premium:	Bolting with preset rotations and torque limit
Software suite 3:	Bolting parameters according to individual customer requirements
Software suite 4:	Bluetooth transmission via alkitronic® APP
Software suite 5:	Documentation of the bolted joints (target-actual status, recording for each joint)

Remote control of single or multiple torque multiplier can be manual or fully automated.

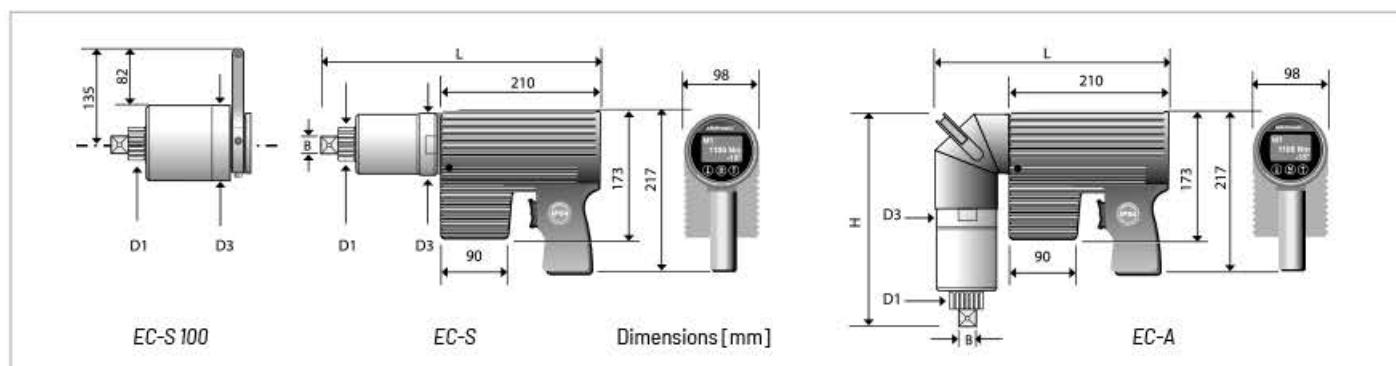

Special solution: Preset torque increment according to customer's requirement (10 Nm / 10 ft.lbs min). All **alkitronic®** torque multipliers with CE-certification.

Electrical data:

Universal AC input 100 V – 253 V, frequency 45 Hz – 66 Hz, power max. 1100 W, protection category I, protection class IP 54 (standard).

havasis

alkitronic® X E-SERIES

EF

Electric Torque Multiplier

Applications

- **alkitronic® EF-S** electrical torque multipliers for torques of 430 to 42,000 Nm (315 to 30,980 ft.lbs).
- **Consistent torque accuracy** on all international power supplies.
- **Precise shut-off torque** also operates with voltage-controlled portable generators.
- Models **alkitronic® EF-A** in angled design with high operating comfort in confined spaces for torques of 500 to 9,800 Nm (370 to 7,230 ft.lbs).

Advantages

- **Low running costs** due to maintenance-free, low-wear, brushless synchronous motor with excellent efficiency.
- **High motor speed:** Up to three times faster than conventional electrical torque multipliers.
- **Permanent higher joint quality** compared to ratchet torque tools by continuous rotation of the square drive.
- **Menu-guided intuitive operation**, with control and warning signals.
- **OLED-Display** anti-glare and high contrast - for perfect reading under all weather conditions.
- **Comfortable working** due to the 360° rotatable motor unit; in addition, hardly any reaction forces are transmitted to the user.

alkitronic® specials

- **Quality bolting** with torque/angle method.
- **Innovative motor protection** with automatic shutdown to ensure bolting quality.
- **Intelligent processor-controlled shut-off electronics** for constant exact reproduction of the preselected torque.
- **Repeat shut-off accuracy ± 2%** for the same bolting application.
- **Exceptionally robust** motor housing (aluminum alloy).
- **For safe, comfortable tool guidance, model-specific operating and holding handles** are included in the scope of delivery. These can be mounted as required at several fastening points provided.

Specifications

All **alkitronic®** electric torque multipliers have CE-certification.
Universal AC input 100 V – 253 V, frequency 45 Hz – 66 Hz, power max. 1400 W.
Protection category I.

Bolting programs

For user-specific applications, modular software packages can be optionally purchased.

Software suite 1: Torque controlled bolting (standard)

Software suite 2: Torque/angle procedure for high-quality bolting connections

Software suite 2

Premium: Torque/angle procedure with adjustable min./max. torque limitation

Software suite 3: Bolting with preset rotations and torque limit

Software suite 5: Bluetooth transmission via **alkitronic® APP**.

havasis

alkitronic® X E-SERIES

E (PG)

Electric Torque Multiplier

Applications

- **alkitronic® E**, 2-speed torque multiplier for torques from 370 Nm to 10,000 Nm(270 ft.lbs- 7,375 ft.lbs).
- The indestructible workaday torque tool is used to loosen or tighten heavy-duty bolted connections with high **on-the-job safety** and short assembly times.
- **Permanently higher joint quality**, compared to ratchet torque tools or tools with impact mechanism, by continuous rotation of the square drive.
- Efficient operation with short fastening cycles: Fast gear for run down and power gear for highest torques and precision.

Advantages

- **Ease of operation**: Fast switching direction of rotation as well as speed-changes. **Wide torque range**, choice from seven torque values pro gear.
- **Operator convenience and health-consideration**: Lightweight ergonomically designed tool. The 360 degree rotating handle ensures convenient working. None of the reaction forces are transferred to the operator.
- Smart processor-controlled, switch-off electronics for consistently precise reproduction of the pre-selected torque.

alkitronic® Specials

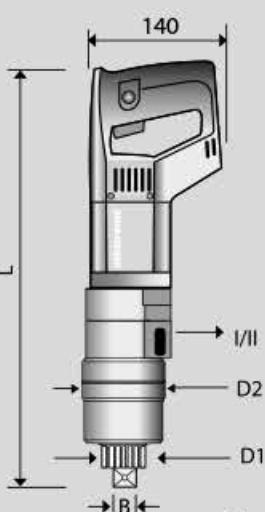

- **Break-proof, impact-proof and resistant to corrosion**: Robust Motor housing made of special polymer.
- **Proven modular high-performance gears**, produced in a chip-free high-precision process.

alkitronic®
HOME OF TORQUE POWER

MDS

Mounting
Documentation Systems

Applications

High quality bolt-connections place the highest demands on bolting technology. The powerful mounting documentation system **alkitronic® MDS** provides a fast, complete and flawless collection of torque data. **alkitronic® MDS** helps to fulfill legal regulations and to comply with international quality standards (documentation to the end user, traceable bolting parameters).

- The product range includes:
The manually operated **alkitronic® HSD**, the pneumatic operated **alkitronic® CLSD**, and the battery driven **alkitronic® EASD**. The torque multipliers are used for torque controlled bolting and reliable measurement data recording on the spot.

Advantages

General

- Optimized process safety and work safety.
- Guaranteed traceability and documented bolted joints.
- Torque can be set and record on site.
- Control panel with OLED display, display of torque in Nm or lbf.ft.

alkitronic® HSD

- Repeatability in tightening – independent of disturbances.
- Torque/torque angle procedure, manual setting, and documentation on site.
- High mobility: independent of external power supply.

alkitronic® CLSD

- Robust motor housing of cast aluminum with proven pneumatic drive.

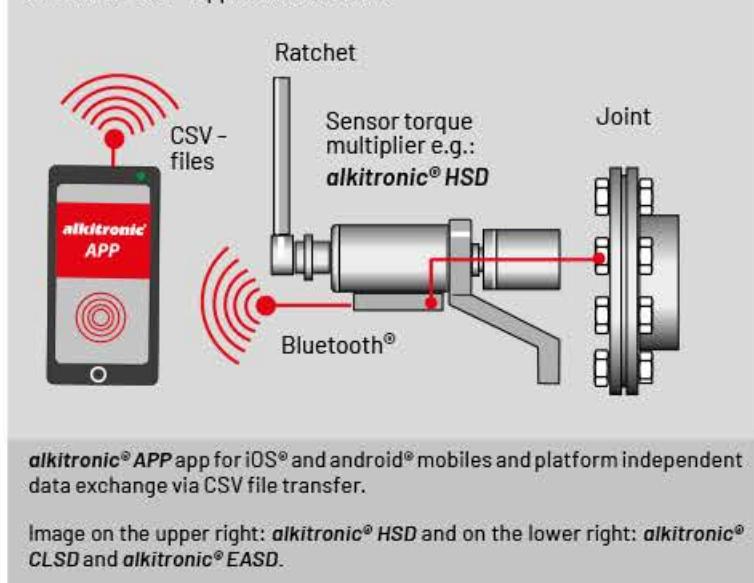

alkitronic® EASD

- Health preserving: ergonomically designed, low noise emission.
No noise protection necessary.
- Powerful and independent: Two lithium-ion battery packs ensure up to 360 screw joints in a row.
- Exact shut-off torque even at low battery levels.

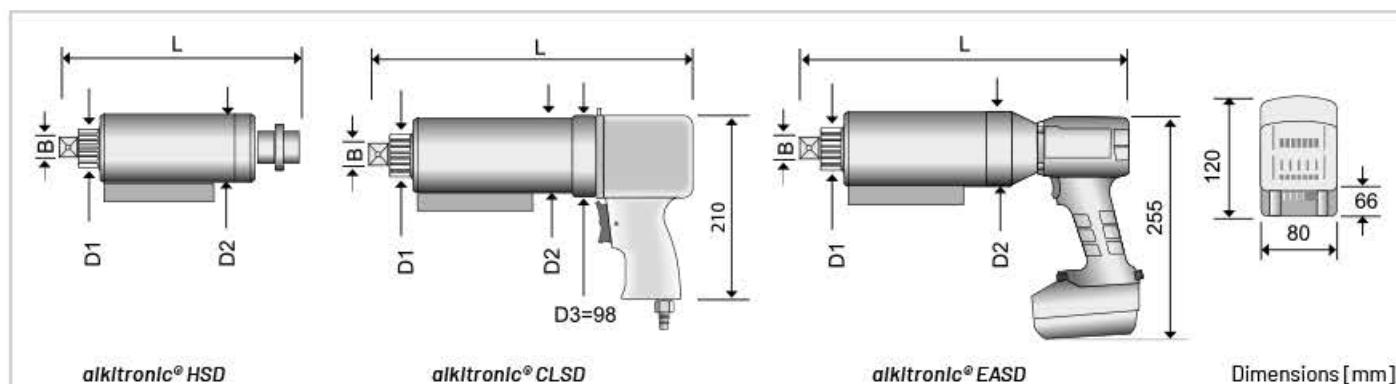

alkitronic® specials

- Torque recording and sensors directly on the square drive.
- Select individual bolting- and measurement method, several preset programs can be chosen.
- Menu-guided multilingual operation, using visual and acoustic control- or warning signals.
- Data transmission via the Bluetooth interface for communication with mobile phones and other devices, such as tablets.
- **alkitronic® APP** developed for measurement data recording and fast data transmission.

alkitronic® APP application scheme

Overview of the programs 1 to 5 (Programs for HSD: 1-4, for CLSD / EASD: 1 and 5, only)

1 Tightening with specified torque

- Torque controlled bolting, bolt connections with target values and tolerance levels.

- Determination of already loosened torque values.
- Repeatable testing method with specified angle.
- CCW: Determination of the starting torque.

2 Tightening with torque/angle procedure

- Pre-torque and angle can be preset.
- Tolerance specification for the final torque (control of bolting quality).
- Storage of actual torque and angle.

- For testing and development purposes. Pre-torque and target resp. final torque are specified.
- Measurement and storage of the reached angle.

3 Checking of torque

- Monitoring of already tightened bolt connections.

5 Display actual torque only with models EASD and CLSD

- Display and recording of the actual torque.

Operating range HSD / CLSD / EASD with OLED graphic display

Select units (Nm/ft.lb) and language (German, English) during setting (image 2). Image 3 shows setting of bolting parameters. Image 4 shows the amount of boltings. Alarms and other notifications made by visual and acoustic signals.

Information on rotational angle setting for torque/angle procedure

A pre-torque and angle of rotation are specified constructively for the bolting connection.
B The angle of rotation can be determined individually and easily with the alkitronic® HSD.

havasis

alkitronic® X P-SERIES

CL

Pneumatic
Torque Multiplier

Applications

- **Continuous rotation**, tightening, or loosening for all heavy duty fastening connections.
- **Perfect for bolted applications** in hazardous, explosive environments.
- **alkitronic® CLS** quick, compact torque multiplier for torques of 55 to 2,555 ft.lbs (75 to 3,460 Nm).
- **alkitronic® CLD comfortable torque multiplier** with rotating handle for torques of 225 to 7,225 ft.lbs (305 to 9,795 Nm).
- **alkitronic® CLS2** high-performance 2-gear machine for torques of 90 to 35,855 ft.lbs (120 to 48,610 Nm).

Advantages

- **Permanently higher joint quality** (compared to impact and hydraulic wrenches) by continuous rotation of the square drive.
- **alkitronic® CLD** - the 360 degree rotating handle ensures comfortable operation. Barely any reaction forces are transferred to the user.
- **alkitronic® CLS2** with fast gear for turning in and simple, quick switching to power gear (is used for applying the final torque).

alkitronic® specials

- **Simple 1-finger operation** for right/left rotation, option to enable the reaction to be locked in one position.
- **Robust cast aluminum housing** with proven pneumatic drive.
- **Proven high-performance gears**, produced in a chip-free, high-precision process produce high loads with low wear.
- **alkitronic® CLS2** with uniquely high torque - 35,855 ft.lbs.(48,610 Nm)
- **Optional silencer levels** to reduce the noise from the motor exhaust on request.

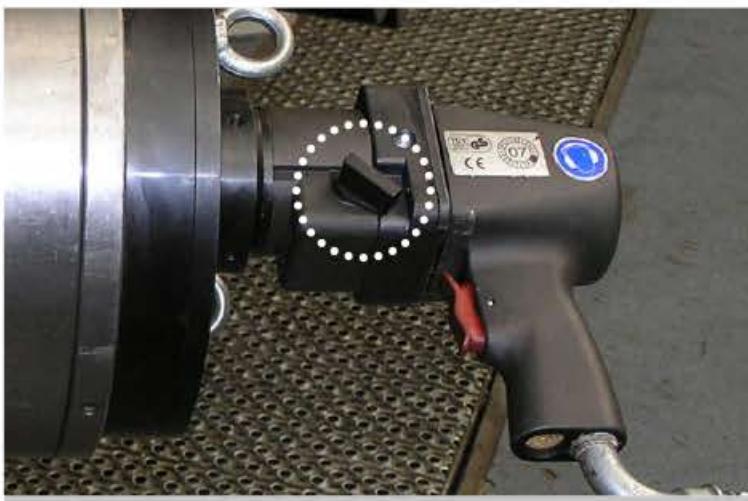

Specifications

On request, you will receive our pneumatic multipliers with

ATEX-Certification: II 2 G D c IIB T6

Prerequisites for best work with the indicated torques are an operating pressure of 29-101 psi (2-7 bar) at a volumeflow of approx. 21.2-31.8 cfm (10-15 l/sec). The torque accuracy depends on the stability of the supply system.

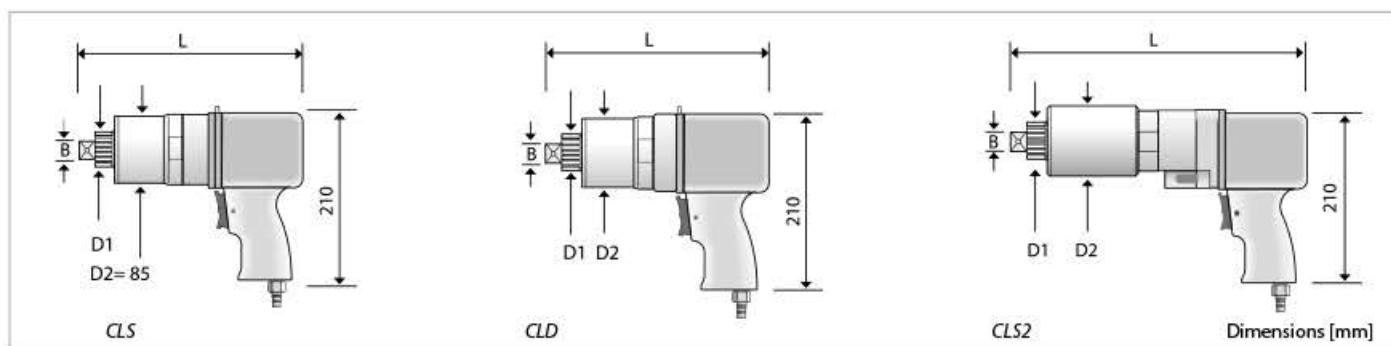

alkitronic® CLS2, 2-gear pneumatic torque multiplier. Mechanically switchable from fast gear to power gear.

alkitronic® CLD torque multipliers in use (figures on the right). Screw connections at a bolt circle and a diesel unit for large construction machines

Product information

alkitronic® CLV models

Pneumatic torque multipliers with remote control for multiple bolted connections and serial assembly in semi-automatic operation. Torques up to 2,555 ft.lbs (3,460 Nm).

We will gladly provide you with comprehensive information on this.

The torque control of the pneumatic alkitronic® torque multiplier takes place via the air supply or pressure regulator of the Maintenance Unit.

Accessories

Maintenance Unit, complete with filter, regulator, oiler and 5 m/16.4 ft hose, incl. couplings.

HOME OF TORQUE POWER

CLV

Pneumatic Torque Multiplier

Applications

- Pneumatic torque multipliers for torques up to 3,460 Nm.
- Multiple fastening connections and series assembly in semi-automatic operations.
- Perfect for bolted applications in hazardous, explosive environments.

Advantages

- Permanently higher joint quality** (compared to impact and hydraulic wrenches) by continuous rotation of the square drive.
- Concurrent, even bolted connection**, crosswise with several alkitronic® CLV torque multipliers.
- Comfortable remote control** for right-left rotation.
- Low noise emission** by integrated muffling.

alkitronic® specials

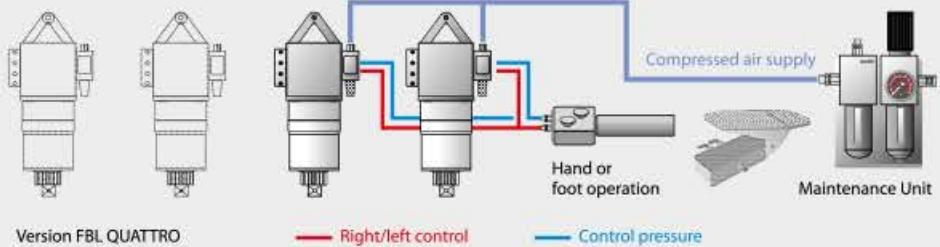

- Universal valve block for pneumatic steering according to specific requirements.
- Robust pneumatic drive with sophisticated high-performance gear, reliably used around the world.
- alkitronic® CLV remote systems** for one to four CLV torque multipliers.
- alkitronic® exhaust system** for a workplace without air swirls (optional).

Applications

Pneumatic and electric torque multipliers for continuous rotation by tightening or loosening hard-to-reach, heavy-duty bolted connections, and deep-bed rims of heavy vehicles (mining industry).
Torques from 100 Nm up to 3,500 Nm, dependent on type.

Advantages

- Economic, safe operation. **No weather-related costly downtime.**
- **Comfortable to operate.** The motor unit can be rotated 360 degrees. One handed operation with CW/CCW.
- Permanently higher joint quality (compared to impact and hydraulic wrenches) by continuous rotation of the square drive.
- Heavy duty, rugged housing made of cast aluminum. **EA2-N** motor housing made of special polymer: break-proof, and resistant to corrosion.

EFCip-N, Models with protection class IP 54:

- **Low running costs.** Maintenance-free, brushless, synchronous motor.
- **Easy connection** to all international power grids, **no adjustments necessary.**

EA2-N, Li-Ion battery driven 2-speed models with release function:

- **Low weight**, ergonomically designed, low noise emissions.
- **No noise protection** necessary.

CLD-N, pneumatic driven Models:

- Ideal for use in explosion-proof working environment.
- World proven reliable pneumatic drive motor.

alkitronic® specials

EFCip-N: Precise shut-off torque and constant torque accuracy at 100-253V / 45-66 Hz, even when operating on mobile units.

EA2-N with two battery packs ensure up to 360 screw joints in a row.

Pneumatic driven models: ATEX approval on request.

0549 449 3535

where sockets will not fit ...

alkitronic® Norwolf specialty products

The **alkitronic® Norwolf Missing Link™**, Model M-ML - the most revolutionary manual torque multiplier for applications where standard tools don't fit. The **alkitronic® Norwolf XCE Link™** is essentially a Missing Link™ with the ability to turn continuously.

M-ML

The M-ML torque multiplier fits into tightly confined areas where sockets will not fit.

The M-ML has become standard in the wind industry for generator feet and yaw pucks.

Available in 4:1 or 6:1 ratios. It should be emphasized that despite a large gear ratio of 6:1, the M-ML offers an ideal power-to-weight ratio.

Advantages

- **Accurate** - operates using levers, not gears.
- **No overload pins to break** - creates safer working environment.
- Uses ratchet or non-ratchet wrenches.
- Optional reaction arm permits operator to react on the same plane.
- Input force is same direction as reaction force **for maximum operator convenience**.

XCE Link

The **alkitronic® Norwolf XCE Link™** is the ultimate answer for gaining access where standard pneumatic multipliers are too tall or bulky to fit application. Available in 3:1 or 4:1 ratios.

There are two available styles. The standard style has a sliding pin with which to react with any standard torque multiplier. The hub style has a specific splined hub to match the input tool of choice.

Advantages

- Totally enclosed aluminum housing.
- **Available in two styles:** pin or hub reaction.
- Continuous rotation for use with any **alkitronic®** pneumatic or electric multiplier.
- Available in special configurations.
- Gearless internal design offers long service life.

Application Example: The Missing Link™ when fitting a coupling in plant construction.

The Missing Link™ fits more applications than any other wrench.

XCE Link™ with hub style to match the input of all **alkitronic®** torque tools. Continuous rotation for use with any electric or pneumatic driven torque multiplier.

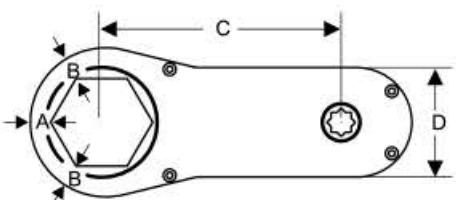

Missing Link™ - the manual torque multipliers are available with spanner sizes from 22 mm to max. 80 mm and ratios of 4:1, 6:1.

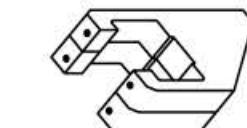

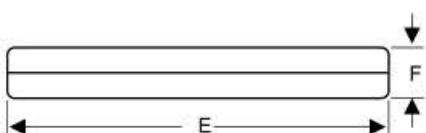

The Missing Link™, the most suitable multiplier for every bolting connection.

M

Manual Torque Multiplier

Kurumsal & Ürünler

havasis.com.tr

Sipariş & Danışma Hattı

0549 449 3535

Applications

- **alkitronic® M** manual torque multiplier - for energy independent precise tightening and loosening of heavy-duty bolt connections.
- Torques from 200 Nm up to 50,000 Nm.
- The ideal torque tool in high explosion-risk areas
- **alkitronic® M** provide safe, economic, problem-free operation. They replace impact wrenches, pipe extensions and other inadequate methods.

Advantages

- Maintenance-free, compact and robust design. They improve on-the-job safety and have short assembly times.
- Low energy input - high torque transfer.
- Integrated anti wind-up ratchet allows jobs to be performed easily, efficiently and safely.

alkitronic® specials

- The components of the **alkitronic®** power gears are manufactured using a high-precision chipless process - in order to ensure the highest possible operational demands with lowest wear.
- The shearing pin built into the drive shaft protects against input overload.

H-AT

Hydraulic Torque Wrench

Kurumsal & Ürünler

havasis.com.tr

Sipariş & Danışma Hattı

0549 449 3535

Application

- **Hydraulic torque wrenches** with two hydraulic hose systems for tightening or loosening heavy bolt connections.
- **alkitronic® H-AT** hydraulic torque wrenches from 80 up to 53,100 ft.lbs (110 up to 72,000 Nm) for threads of M14 and larger.
- **No checking needed:** High repeatability $\pm 3\%$ for the same bolting process.

Advantages

- **Robust and ergonomic:** Hard-wearing, ergonomically shaped housing design made of high strength Aluminium-Titan-Alloy.
- **Simple and low weight:** Easy handling and low weight. Simply replug the square drive from tightening to loosening.
- **Durable and safe:** Bevelled torsion-resistant, highly-loaded one piece design. Higher work-safety due to advanced and sustainable design.
- **High economic efficiency:** Long operating life, reliable bolting, low maintenance.

alkitronic® specials

- **alkitronic® H-AT** developed for flexible applications in restricted space, ¹ support arm incrementally adjustable (see drawing below).
- **High flexibility:** Convenient, secure and reliable pivoting one-piece joint couplings. Pivotable in two levels (360° horizontally, 180° vertically).
- Robust, rough toothed ratchet for **high torque accuracy**.
- **Solid, precise, especially powerful:** Unique design of the drive pawl.

havasis

alkitronic® X H-SERIES

Applications

- Hydraulic torque wrench with two hydraulic hose system for tightening or loosening heavy bolt connections.
- **alkitronic® H-AX** convertible type torque wrench up to 35,650 ft.lbs (49,000 Nm).
- Drive element with interchangeable hexagon link from 14 to 145 mm.

Advantages

- Simple handling and low weight.
- Economic construction with few single components.
- High efficiency with minimum maintenance requirements and low costs.
- Hard-wearing, ergonomically shaped housing design, made of high-density aluminium alloy.
- Highly flexible due to simple, fast changing of the hexagon links.
- Trouble-free support without affecting the torque accuracy by lateral force.

alkitronic® specials

- Convenient, secure and reliable individually pivoting joint couplings (360°). Capable of withstanding up to 4x higher maximum operating pressure.
- Robust ratchet with fine teeth for high torque accuracy and a max. stroke of 28°.
- Constructive precise guided drive element.
- **alkitronic® H-AX** developed for applications in restricted space and difficult to access areas: **Drive element and hexagon link in line, extremely flat and flush design.**

X Driver Systems

Hydraulic Wrenches

thinnest, fastest and most versatile

X Driver Hydraulic Wrench System

The **alkitronic® Norwolf X DRIVER SYSTEM** - the most revolutionary hydraulic torque wrench system ever created. The profiles are totally flat with no extrusions that create hangups. The design with a smaller cylinder bore but longer levers, creates less stress on all parts. Easier to get into confined areas and around nuts in hard to access spaces. With the durability of solid steel design, fewer parts, and clean-lined construction.

X Driver

- Hydraulic power head with two hydraulic hose system.
- Slimmest design - one piece piston construction.
- Only one high pressure o-ring - easily changed with four bolts.
- Novel swivel design - 360° or 360 x 360 with one piece add on.
- The power head locks into the separate drives without pins or screws.
- All alloy steel construction - only true convertible tool.
- Ready for optional handle.

A Drive (hex link)

- Slimmest design - no loose shroud - totally enclosed.
- Reaction arm/pad ready with 2 pin holes.
- Patented reaction pawl easily disengaged with screw.
- Fewer parts. Other hex links have many moving parts, increasing breakdowns and need for complex repairs.
- Deepest reach on the market - fits all flanges.
- Upon testing, the A-Drive is 10-50% faster than other hydraulic wrenches.

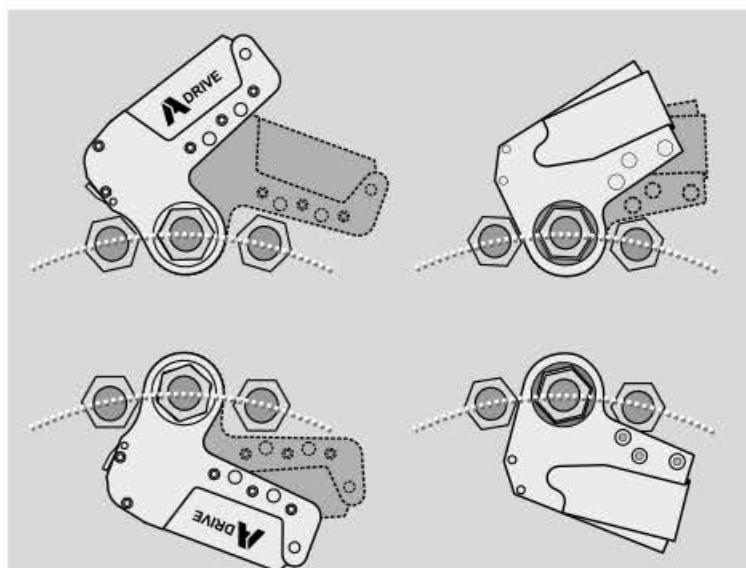

V Drive (square drive)

- Push through drive with ball locks.
- Fastest 40° stroke making tool up to 30% faster per stroke.
- Most versatile, patented reaction arm. Arm never needs to come off tool for resetting, unlike competitors. Adjusts in all directions with posi lock locator buttons. Totally unique design.
- Thinnest width square drive tool on the market - totally enclosed.
- Optional solid reaction arm available.

Specifications

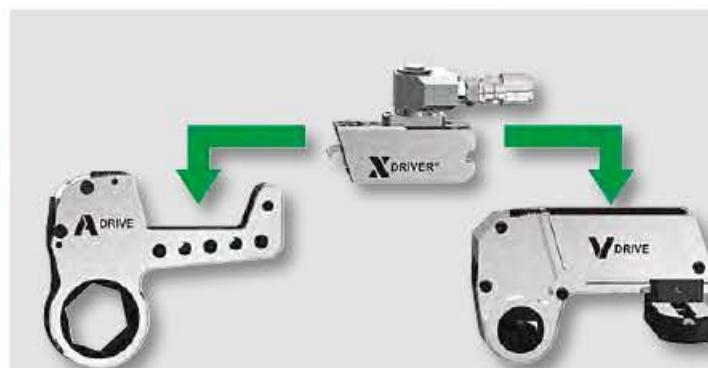

A prerequisite for exact reproducibility of the specified torque ranges is an operating pressure of 100 to 700 bar.

Repeatability +/- 3%.

A-Drive and X-Drive fits more applications than any other wrench.

The patented design curve creates the longest throat reach, allowing the widest approach angle to fit the tool on the nut, easily, without jogging or manually moving the ratchet. This curve makes the X-Drive the fastest to fit in the industry, on both in-line and inverted applications.

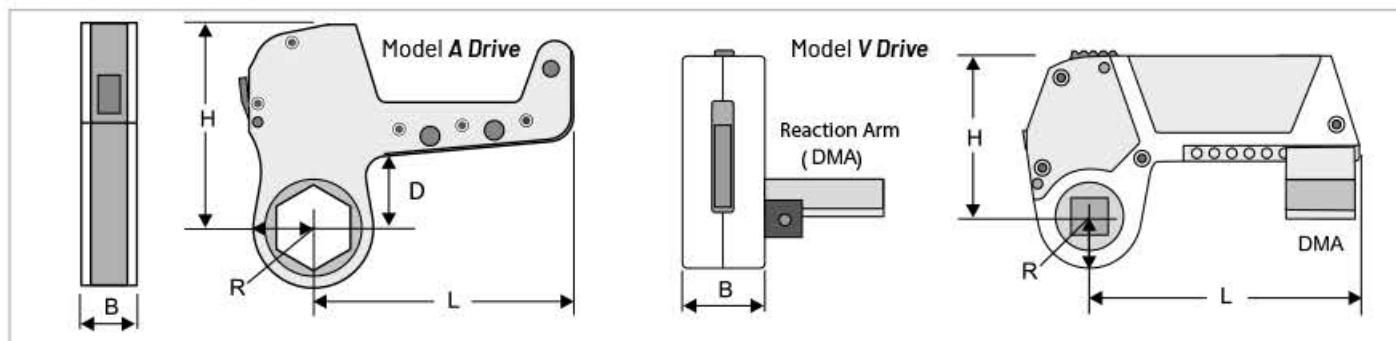

The hydraulic wrench is so advanced it's not only a tool, it's an entire system. The X-Driver locks into drives which fully protect the cylinder from reaction points. The X-Driver pivots inside the drives, in-line, to prevent side load and tension to the cylinder, for safety and endurance.

Application Example: A-Drive when fitting a flange coupling in plant construction.

Hands-Free a Drive Safety: The catch lever holds the tool against the reaction point on the piston retract, preventing the operator from holding the tool against the reaction area during tool kick-back on the retract stroke.

fast & heavy-duty resistant

alkitronic® VELOX

Applications

- alkitronic® VELOX** is a robust, long-life quality product made in Germany.
- This unique electrical hydraulic pump (protection class IP65) is protected against rain, splash water and dust deposit to eliminate costly downtime.
 - Its suitable for 110V or 230V main grids and voltage-controlled mobile power units.

Advantages

- High precision** ($\pm 3\%$) through all pressure ranges, defined by precisely adapted oil flow rate.
- Air cooling, robust design, low weight.** The housing design ensures optimum heat dissipation.
- Simple operating:** one-push-button remote control for ergonomic, working convenience and distance safety.
- High working speed and short set-up times.** Can connect two hydraulic torque tools to increase productivity and to save time and money.
- Flexible bolting applications.** Compatible with almost all hydraulic torque wrenches, regardless of cylinder size and torque range.

alkitronic® specials

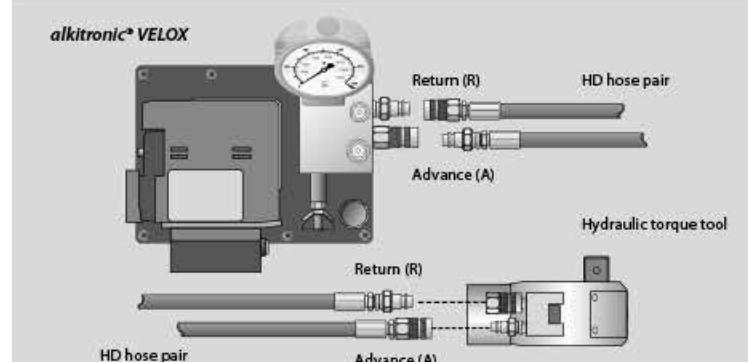

- Low maintenance costs** due to the maintenance-free, low-wear and brushless synchronous motor. No magnetic control valves and therefore no wear.
- Modular construction** for cost-saving upgrade or parts exchange.
- Individual operation** - basic version with manual control.
- Integrated motor protection** to avoid damage due to overload.

electric Hydraulic Pump LEVA

Applications

- The **alkitronic® LEVA** is a robust, powerful, electric driven hydraulic pump.
- Small, low weight, reliable** - ideal for service use.
- Simple operation**, continuously adjustable up to 700 bar.
- Trouble-free operation on the 230 V main grids** as well as on voltage-controlled mobile generators.

Advantages

- Flexible bolting applications:** Compatible with almost all hydraulic torque wrenches, regardless of cylinder size and torque range.
- High precision through all pressure ranges**, defined by precisely adapted oil flow rate.
- Simple operating remote control for ergonomic working.** 2-button operation for start / advance stroke with automatic return stroke and stop function.
- Rapid pressure relief** of the system via a manual solenoid valve.
- Pump design with **very low heat generation**. Oil level control with continuous analog temperature display.

alkitronic® specials

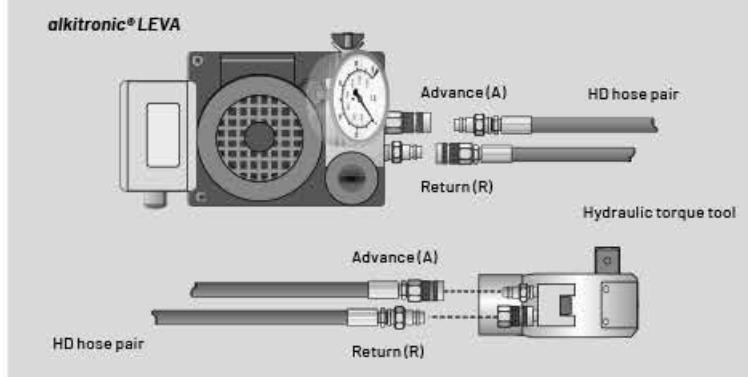

- Modular, clear assembly structure for **cost-saving parts exchange**.
- Sturdy profile frame for **stability and transport security**.
- Significant increase in efficiency** thanks to extremely short training period.

Technical Data

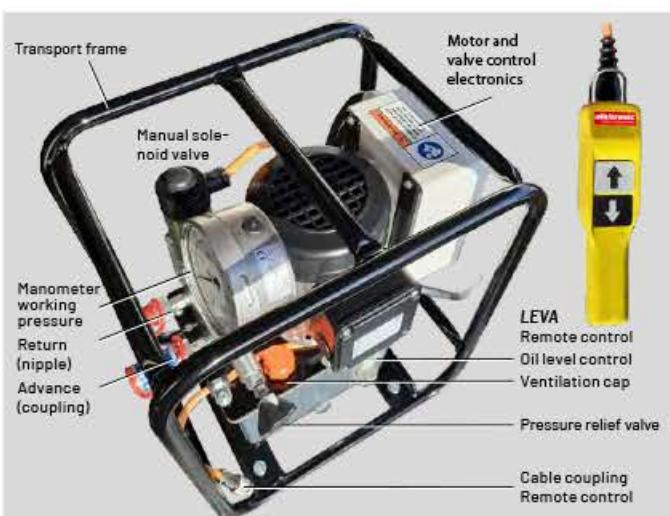

alkitronic® LEVA infinitely adjustable pressure setting up to 700 bar (maximum operating pressure: 700 bar).

Description	alkitronic® LEVA
Drive electrical, nominal sensitivity	230 V / 50 Hz, 250 W
Protection class	IP20
Output low pressure area	3.2 l/min < 75 bar
Output medium pressure area	0.9 l/min at 75 to 220 bar
Output high pressure area	0.4 l/min to 700 bar
Tank capacity	1.8 l
Surrounding temperature (use and storage)	-10 °C up to +40 °C
Noise emission	82 dB(A)
Weight exclusive oil with transport frame	approx. 18.4 kg
Dimensions with transport frame (L x W x H)	330 x 250 x 410 mm

Compatible: Diagram of hydraulic hose connection

Included in the delivery:
Remote control, transport frame, hydraulic oil, instruction manual

alkitronic® AT Hydraulic Torque Wrench

We recommend our hydraulic torque wrenches for secure and reliable tightening or loosening of heavy bolt connections.

havasis

alkitronic® X H-SERIES

NOVA

Electric Hydraulic Pump

Applications

Electric driven hydraulic pump, **usable worldwide 100-253 V / 45-66 Hz**, up to 700 bar / 10,000 psi for hydraulic wrenches with single or double-acting cylinders.

- Duo- or Quattro version (for 2 or 4 wrenches etc.) optional.
- Robust compact design for use on the roughest construction sites.

Advantages

- **Huge oil flow** due to intelligent electronic controlling, powerful motor.
- Easiest automatic operation **for all cylinder sizes** without any manual presetting.
- Ergonomic remote control for manual or automatic operation.

alkitronic® specials

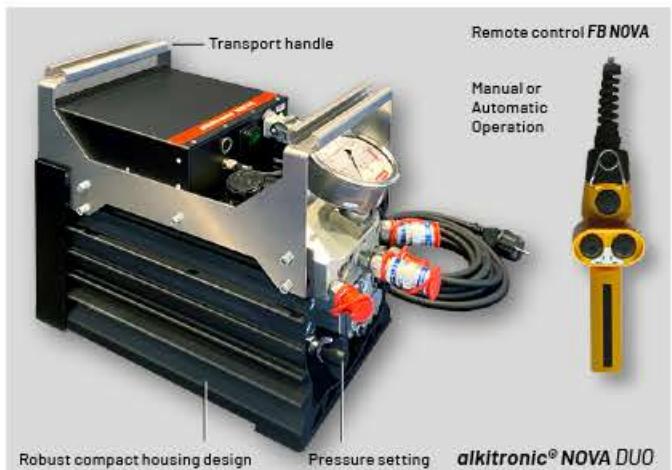

- **No magnetic valve control**
Powerful but gentle changeover from power stroke to idle stroke, due to direction switch of the drive motor, which guarantees high durability of the equipment.
- **Capable of continuous operation – minimal heat generation**
No oil overheating by the innovative motor drive in combination with the automatic mode. The automatic operation only provides the flow supply with the working pressure necessary for efficient bolting.
- **Low running costs**
Brush-free synchronized motor, maintenance-free and low wear. Usable on all international mains supply without any change.

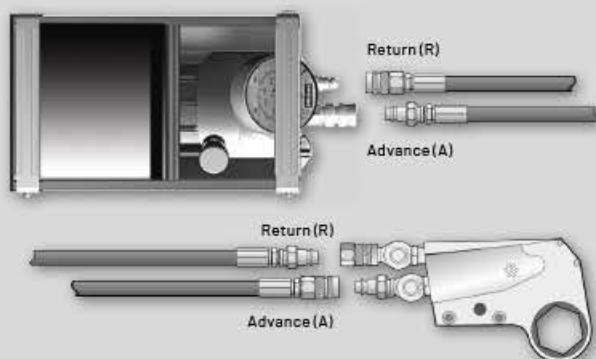

Technical Data

alkitronic® NOVA with infinitely adjustable pressure setting up to 700 bar / 10,000 psi (700 bar / 10,000 psi max. pressure).

Designation	alkitronic® NOVA
Drive electrical	100-253 V / 45-66 Hz
Nominal capacity	3500 W max.
Oil flow:	
low pressure	15 l/min up to 70 bar
medium pressure	10 l/min up to 180 bar
high pressure	1.5 l/min up to 700 bar
Weight including oil	28.5 kg
Dimensions L x W x H (mm)	350 x 220 x 300
Surrounding temperature	-20 °C up to +50 °C

Connection scheme hydraulic hoses

Delivery range: High pressure hoses (DN 8), Length 5m

Robust design with load hooks and handles, certified for crane transportation.

Product News

pneumatic Hydraulic Pump LHP2

Applications

- The **alkitronic® LHP2** is a robust, powerful, pneumatic driven hydraulic pump.
- Perfectly for use in explosion risk areas.** Optional with ATEX-Certification: II2 GDcT4 version.
- Simple operation** and infinitely adjustable pressure setting up to 700 bar.
- Ideal working conditions** with an air pressure of 7 bar and a flow rate of 2,100 l/min or 3,800 l/min (LHP2 quattro).

Advantages

- High working speed and short set-up times. **Connection of up to four hydraulic torque tools** is possible. This increases productivity and saves time and money.
- Flexible bolting applications. **Compatible with nearly all hydraulic torque wrenches**, independent of cylinder size and torque range.
- High precision ($\pm 3\%$) through all pressure ranges by precisely adapted oil flow rates.
- Safe and simple remote control** of the forward and return stroke.

alkitronic® specials

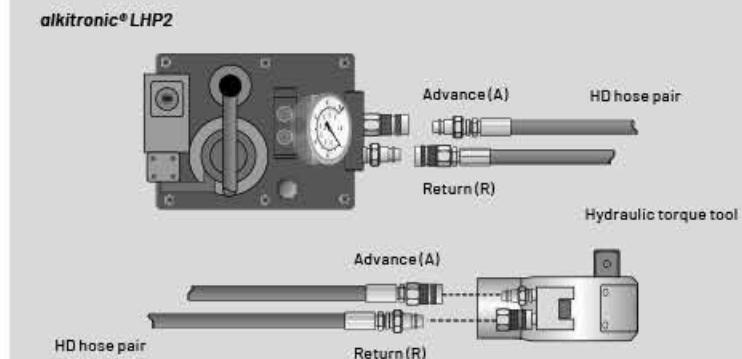

- Modular, clear assembly structure for a **cost-saving parts exchange**.
- Low operating costs** thanks to maintenance-free and low-wear operation.
- Sturdy profile frame with tool box for **stability and transport security**.
- Integrated silencer** minimize health hazards at work.

Technical Data

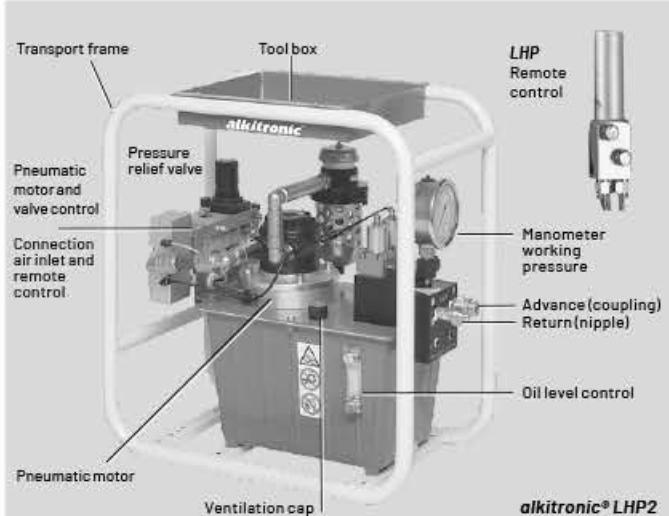

alkitronic® LHP2 infinitely adjustable pressure setting up to 700 bar (maximum operating pressure: 700 bar).

Description	alkitronic® LHP2	LHP2 quattro
Driving power, pneumatic motor	1.9 kW	3.0 kW
Output low pressure area	8.5 l/min at 80 bar	10.5 l/min at 70 bar
Output high pressure area	0.77 l/min at 700 bar	1.0 l/min at 700 bar
Tank capacity	approx. 10 l	
Surrounding temperature (use and storage)	-20°C up to +50°C	
Noise emission	76 dB(A)	
Weight exclusive oil with transport frame	approx. 25 kg	
Air consumption	2,100 l/min at 7 bar (74 ft³/min)	3,800 l/min at 7 bar (134 ft³/min)
Dimensions with transport frame (L x W x H)	530 x 310 x 566 mm	

Diagram of hydraulic hose connection (one wrench example)

Included in the delivery:
Remote control, transport and security frame, hydraulic oil, instruction manual.

Flange Boy

The ideal aid for separating
piping flanges

Application and Advantages

- Easy and safe mechanical separation of piping flanges.
- All parts manufactured with highest quality materials.
- **FLANGE BOY** is proven in international tests.

Operation instructions

Insert the **FLANGE BOY** in one of the bolt holes of a flange. Slip the bolt support plate, which is held by a chain, between the flange facings underneath the setscrew. Once the **FLANGE BOY** is jammed tight, continue turning with a wrench until a position is reached where a gasket can be replaced or a spade set. Then, slacken back the setscrew to the point where the support plate can be removed, and tap the setscrew with a hammer to free the **FLANGE BOY** from the bolt hole.

Recommend the use of two **FLANGE BOY**s in cases where the transfer of very great force is required. Insert the second **FLANGE BOY** in the corresponding hole of the companion flange. The force, applied will act on the same support plate.

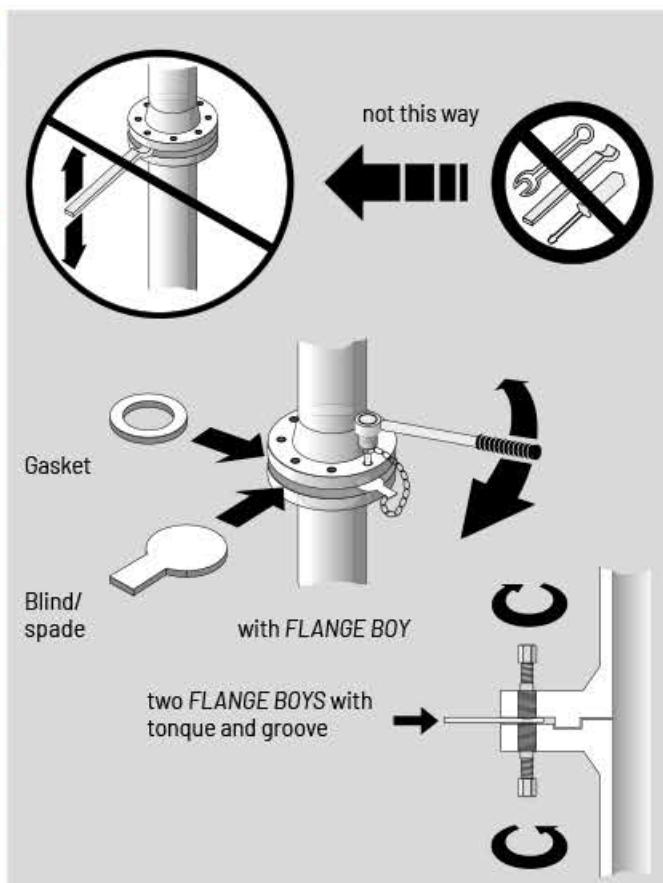

You will, thus, be able to apply heavy loads without risking damage to the support plate. Due to the flange proportions, it is not possible to increase the thickness of the support plate.

Do not load a plate on side while using great force!

Grease the threads well before using!

Warning:

To avoid serious injuries, never put your fingers between the separated flanges!

DIN Flange Dimensions (further sizes - upon request)

Bei den Sonderzubehörteilen empfehlen wir die Abstützungen den technischen Gegebenheiten anzupassen (vermeiden Sie z.B. eine Vollbelastung). Beachten Sie, dass bei Verwendung von Sonderzubehörteilen die Krafteinwirkung auf das Werkzeug, vom Normalfall abweichen kann.

Zubehör ohne Bruchgarantie - M₀ Grenze abhängig von der Abstützung.

Fragen Sie uns nach Zubehör in andere Größen oder Abmessungen.

We recommend to adapt the reaction devices/arms to the technical conditions when using special accessories (e.g. avoid full load). When using special accessories please mind that the power effect on the tools may differ from the normal cause.

Accessories without guarantee against breakage - torque limit depends on reaction device/arm.

Please ask for accessories in further sizes or dimensions.

Product News Backup Wrench

Applications

- The **alkitronic® backup wrench** prevents self-holding the nuts from spinning during the tightening and loosening of a bolt. To release the tension over the adjusting screw, easily and quickly remove the backup wrench, which is clamped firmly against the support after mounting.
- The support on the backup wrench is fixed with a bolt. After tightening the fixation bolt must be loosened and the backup wrench released. This method is the most flexible and secure one.
- The **alkitronic® backup wrench** consists of a handle and a cartridge with different AF sizes.

Advantages

- The **alkitronic® backup wrench** with the cartridges has less total weight than a one-piece construction.
- Strong and sturdy version for robust working
- Ergonomic and safe handling
- Compact design
- Mechanical function – no hydraulic
- After the application easy and simple detachment
- For use with or without handle
- Waiving inadequate tightening/loosening using screwdrivers, clamping tongs, socket spanners, etc.

Hanging Mount EFCip

Applications

- alkitronic® Hanging mount:** For industrial and stationary use, such as in combination with a balancer (pulley block).
- A hanging mount perfectly adapted to fit the EFCip/ECWip, specially developed by **alkitronic®**.
- Portable and quick to use:** Designed for professional use for all your bolting needs.
- Multifunctional potential:** Designed for use on industrial cranes based on the German quality and safety standard.

Advantages

- Functional efficiency:** Quicker assembly with fast, effort-saving transfer for different bolting situations.
- Versatile:** Hanging mounts for horizontal or vertical fastening connections, depending on requirements and application.
- Quick to use:** EFCip and ECWip fastening material included.
- Safe handling:** Easy to attach and detach.
- Original alkitronic® quality accessories:** Stainless steel materials.
- Ergonomic:** Physically reducing worker strain.
- Now available for all EFCip models.

Mount for vertical driving, Item No.: 11425

Mount for horizontal driving, Item No.: 11424

Horizontal
alkitronic® EFCip application

Installation information for
alkitronic® EFCip/ECWip

The mount is secured in the thread for the blocking pin. A blocking pin, however, cannot be used during the application.

The hanging mount thus ensures safe and quick torque multiplier height movements without twisting the lifting strap or balancer steel cable.

Transport rollers for alkitronic® carry cases

Applications

- **Transport rollers for carry cases**, ideal for all heavy torque multipliers (e.g. *alkitronic® EF*) or hydraulic pumps (e.g. *alkitronic® NOVA*).
- **Easy transport**: Effortless manoeuvring of the *alkitronic®* carry cases by pulling or pushing.
- **Flexible assembling**: Can be fixed with straps, stickers, or screws (optional). All components can be reused. Spare stickers are included in the set.
- Up to 50 kg load capacity per roller pair.

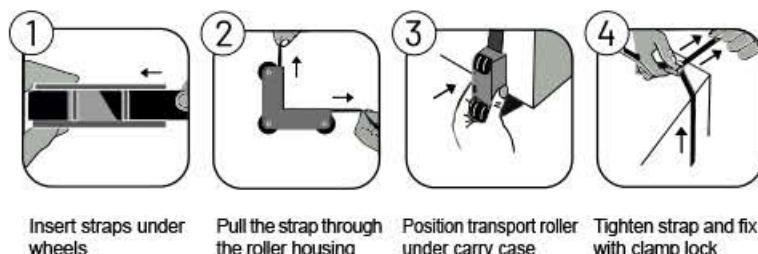

Advantages

- **Efficient working**: Fast and ergonomic transport of the carry cases.
- **Easy set-up**: Simple and pragmatic retrofitting and assembly. No tools required!
- **Safe for your health**: Pleasant pulling instead of carrying.
- **alkitronic® sustainability standard**: Manufactured in an environmentally friendly manner from renewable materials (manufacturer's claim).
- Reusable and versatile!

Example: Assembly of transport rollers with straps

Insert straps under wheels

Pull the strap through the roller housing

Position transport roller under carry case

Tighten strap and fix with clamp lock

Scope of supply

One set of rollers includes*:

- 2x transport rollers
- 2x straps with clamp lock (2.5 x 400cm)
- 12x adhesive dots
- Color: black

* For all technical data and instructions, please refer to the manufacturer's data sheet supplied with the device

We recommend the transport rollers for the following *alkitronic®* carry cases:

XE-Series:	Models EF, EC
XM-Series:	Selected models, e.g. HG-60
XP-Series:	Selected models, e.g. CLS 2/4800
XH-Series:	Selected models, e.g. NOVA hydr. pump

alkitronic®
HOME OF TORQUE POWER

**alkitronic® – the torque technology manufactory
for extreme applications**

Why choose us

The alkitronic® brand stands for:

**Quality:**

Our products are engineered and manufactured in Germany

**Experience:**

Since 1984 we have assembled vast and exceptional experience in bolting technology

**Manufactory:**

We offer premium production with highest quality materials and standards

**Service:**

We provide you and your alkitronic® product with several customized services

**Innovation:**

We continuously invest in research and development for improvements and innovative technologies

About us

Engineering, manufacturing and distribution of high-quality and innovative products in the field of bolting systems – this is what alki TECHNIK GmbH stands for.

As a leading international company, located in Germany and operating in more than 60 countries worldwide, we have successfully developed and produced specialized bolting equipment since the early 1980s under the alkitronic® brand.

Our products

The alkitronic® product range is extremely diverse and offers solutions for your individual needs:

- Electric Torque Multipliers
- Battery-driven Torque Multipliers
- Pneumatic Torque Multipliers
- Hydraulic Torque Wrenches
- Manual Torque Multipliers

Our core industries

alkitronic® products are supplied to customers globally targeting a wide range of industries:

- Wind energy
- Steel construction
- Construction machinery
- Agriculture and forestry machinery
- Water/oil/gas/chemicals
- Food and beverage

We are also pleased to serve customers in building and construction, open cast-mining, railways and tracks, ship-building and offshore construction, etc.

Our customers

Our national and international customers and partners trust in the high quality of alkitronic® products for over 30 years such as Audi, BMW, Caterpillar, Komatsu, Liebherr, MAN, Siemens and ThyssenKrupp.

High product quality

Creation, design and distribution from a single reliable and highly experienced source with German state-of-the-art engineering.

- ✓ long product life by using high-quality materials such as aluminium
- ✓ high break resistance, stability and resistance guarantee a low risk of failure
- ✓ ideal force multiplier with a high reliability
- ✓ gives the tool the required robustness for the application in various industries
- ✓ lower running costs and maintenance requirements compared to plastic housing

Precision

All repeatedly measured torques of alkitronic® tools work extremely precise and show a max. deviation of $\pm 3\%$ within the range of the required target range.

- ✓ accuracy is constant with every single bolting connection
- ✓ fast and safe processing of bolting connections
- ✓ no reworking necessary, torque values are reliably reached

Efficiency

Our brushless motor guarantees high efficiency.

- ✓ creates a greatly reduced risk of failure
- ✓ provides no hidden costs for maintenance and repair
- ✓ guarantees a fast cost amortization
- ✓ smooth running at reduced noise level compared to brushed motor
- ✓ active regulation of drive rotation speed
- ✓ constant torque even at low battery levels - for battery tools

Intuitive design

The compact and innovative design guarantees an intuitive handling with a safe and easy menu navigation.

- ✓ use in restricted space
- ✓ no extensive training required
- ✓ simple 1-finger trigger operation for forward and reverse
- ✓ ergonomic and comfortable operation
- ✓ safe and health-conform operation, e. g. the 360° rotating EFCip handle prevents reaction forces being transferred to the operator

Permanent higher joint quality

Compared to ratcheting or impact wrenches the alkitronic® tools perform bolting connections by rotating continuously and applying the exact torque value, all in one work step.

- ✓ pretension force is reached with high accuracy
- ✓ quality of the bolting connection is greatly increased
- ✓ faster and safer than ratcheting bolting procedures

Digital connectivity

The digital connectivity of our alkitronic® products provides for an easy documentation (for our new generation models).

- ✓ bluetooth interface & transmission via alkitronic® APP
- ✓ documentation of the bolted joints

Safe and high-quality bolting by automatic motor-shut-off

Our alkitronic® electric torque multipliers switch off automatically as soon as the required/pre-set torque is reached. This provides you:

- ✓ pre-set torque values are precisely and reliably reached through an intelligent processor-controlled motor
- ✓ prevents overtightening of the bolting connection
- ✓ improved safety standards
- ✓ longer duration of the bolted connection

Worldwide and voltage independent use of alkitronic® tools

The brushed motors reach the torque via voltage control. Our brushless motors are current controlled (amps). This enables us to detect and compensate the temperature increase of the motor during operation.

- ✓ due to the built-in power supply in the EFCip and EF we can always achieve the same torque within a voltage range of 100 - 253V / 45 - 66 Hz.
- ✓ even with very long electricity extension cables, when the voltage drops, we have no loss of torque

Suitable for all weather conditions

The protection class IP 54 specifies the suitability of our electrical components for various ambient conditions, as well as the protection of human beings against potential danger during use.

- ✓ productivity and safety when working in moisture or dust/dirt conditions
- ✓ our tools are dust- and splashproof
- ✓ various fields of application

Service and training

Your plus for more service and training.

- ✓ technical advice on site
- ✓ training offers
- ✓ manufacturer's calibration and certification
- ✓ spare part and repair service
